

In the Claims

1. (Currently Amended) A method performed by at least one information handling system, the method comprising:

receiving an excerpt of information at a computing device; and

~~in response to the excerpt, performing at least one of the following operations: in an XML format, automatically storing the excerpt, in an XML format, in a folder on a storage medium that is preselected by a first user, wherein the folder is selected from a group consisting of a group folder and a public folder, the group folder is accessible by one or more second users specified by the first user as a group, the public folder is accessible to all users subscribed to the public folder; and, in the XML format, automatically outputting the excerpt to one or more second users preselected by the first user.~~

2. (Original) The method of claim 1, wherein the information handling system is a first information handling system, wherein the excerpt has a non-XML format, and comprising:

in response to the excerpt, automatically translating the excerpt from the non-XML format into the XML format, so that the translated excerpt is compatible for operation with a second information handling system of at least one of the second users.

3. (Original) The method of claim 2, wherein the stored excerpt is the translated excerpt.

4. (Original) The method of claim 2, wherein the output excerpt is the translated excerpt.

5. (Original) The method of claim 1, wherein the information handling system is a first information handling system, wherein the excerpt has an alternate XML format, and comprising:

in response to the excerpt, automatically translating the excerpt from the alternate XML format into a generic XML format, so that the translated excerpt is compatible for operation with a second information handling system of at least one of the second users.

6. (Original) The method of claim 5, wherein the stored excerpt is the translated excerpt.

7. (Original) The method of claim 5, wherein the output excerpt is the translated excerpt.

8. (Currently Amended) A system, comprising:

at least one information handling system comprising a computing device and a storage medium, the at least one information handling system configured to for:

receive receiving an excerpt of information at the computing device; and

in response to the excerpt, performing at least one of the following operations: in an XML format, automatically store storing the excerpt, in an XML format, in a folder on the storage medium that is preselected by a first user, wherein the folder is selected from a group consisting of a group folder and a public folder, the group folder is accessible by one or more second users specified by the first user as a group, the public folder is accessible to all users subscribed to the public folder; and, in the XML format, automatically outputting the excerpt to one or more second users preselected by the first user.

9. (Original) The system of claim 8, wherein the information handling system is a first information handling system, wherein the excerpt has a non-XML format, and wherein the first information handling system is for:

in response to the excerpt, automatically translating the excerpt from the non-XML format into the XML format, so that the translated excerpt is compatible for operation with a second information handling system of at least one of the second users.

10. (Original) The system of claim 9, wherein the stored excerpt is the translated excerpt.

11. (Original) The system of claim 9, wherein the output excerpt is the translated excerpt.

12. (Original) The system of claim 8, wherein the information handling system is a first information handling system, wherein the excerpt has an alternate XML format, and wherein the first information handling system is for:

in response to the excerpt, automatically translating the excerpt from the alternate XML format into a generic XML format, so that the translated excerpt is compatible for operation with a second information handling system of at least one of the second users.

13. (Original) The system of claim 12, wherein the stored excerpt is the translated excerpt.

14. (Original) The system of claim 12, wherein the output excerpt is the translated excerpt.

15. (Currently Amended) A computer readable medium having stored thereon a set of instructions, which when executed by a computer having a processor and memory, cause the computer to perform operations ~~program product~~, comprising:

~~at least one computer program processable by at least one information handling system for causing the information handling system to:~~

receiving ~~receive~~ an excerpt of information; and

~~in response to the excerpt, performing at least one of the following operations: in an XML format, automatically storing the excerpt, in an XML format, in a folder that is preselected by a first user, wherein the folder is selected from a group consisting of a group folder and a public folder, the group folder is accessible by one or more second users specified by the first user as a group, the public folder is accessible to all users subscribed to the public folder; and, in the XML format, automatically outputting the excerpt to one or more second users preselected by the first user; and~~

~~apparatus from which the computer program is accessible by the information handling system.~~

16. (Currently Amended) The computer readable medium program-product of claim 15, wherein the information handling system is a first information handling system, wherein the excerpt has a non-XML format, and wherein the computer program is processable by the information handling system for causing the information handling system to:

in response to the excerpt, automatically translate the excerpt from the non-XML format into the XML format, so that the translated excerpt is compatible for operation with a second information handling system of at least one of the second users.

17. (Currently Amended) The computer readable medium program-product of claim 16, wherein the stored excerpt is the translated excerpt.

18. (Currently Amended) The computer readable medium program-product of claim 16, wherein the output excerpt is the translated excerpt.

19. (Currently Amended) The computer readable medium program-product of claim 15, wherein the information handling system is a first information handling system, wherein the excerpt has an alternate XML format, and wherein the computer program is processable by the information handling system for causing the information handling system to:

in response to the excerpt, automatically translate the excerpt from the alternate XML format into a generic XML format, so that the translated excerpt is compatible for operation with a second information handling system of at least one of the second users.

20. (Currently Amended) The computer readable medium program-product of claim 19, wherein the stored excerpt is the translated excerpt.

21. (Currently Amended) The computer readable medium program-product of claim 19, wherein the output excerpt is the translated excerpt.

22. (New) The method of claim 1, further comprising, in the XML format, automatically outputting the excerpt to one or more second users preselected by the first user.

23. (New) The method of claim 1, further comprising, in response to a search term query, providing search results of a list of public folders with information about one or more websites comprising the queried search term.

24. (New) A method performed by at least one information handling system, the method comprising:

at a computing device, receiving an excerpt of information about one or more websites;
at the computing device, receiving a folder selection from a first user to store the excerpt therein, the folder is selected from a group consisting of a group folder and a public folder, the group folder is accessible to one or more second users specified by the first user as a group, the public folder is accessible to any user subscribed to the public folder; and
automatically storing the excerpt in the folder on a storage medium selected by the first user.

25. (New) The method of claim 24, further comprising, in response to a search term query, providing search results of a list of public folders with information about one or more websites comprising the queried search term.
